RE: Petition for Including Acupuncture in the U.S. Health Care Reform Plan

Honorable (收信人的姓名和职务):

I am writing this letter to ask for your support for the inclusion of Acupuncture as a part of primary medical services to be covered in the U.S. Health Care Reform Plan.

It is well known that Acupuncture is a safe, successful and cost-effective primary health care protocol, and a primary health care system that is routinely utilized by millions of Americans. Clinical studies have proved that to include Acupuncture as a source of primary care will significantly increase the quality of medical care and markedly reduce conventional medical costs. Inclusion of Acupuncture in the U.S. Health Care Reform Plan clearly meets the specific goal of President Obama's health care reform and is in keeping with the best interest of Americans.

My personal experience with acupuncture...(根据您的需要，可表达您个人对针灸的认识和体会。也可以删除此段)

Thank you for your considering my opinion.

Sincerely,
